

## **A REMARKABLE DISCOVERY AND A MAN FOR THE AGES**

This article is about an accidental discovery that is a possible cure for cancer as well as a solution for our energy crisis. It is also about a 63 year old man who, while battling leukemia, had the ingenuity and passion to build a machine that emits radio frequency waves. His name is John Kanzius who originates from Erie, Pa. and who now lives on Sanibel Island, Florida. The idea for the invention came to him while involved in one of the courses of chemotherapy. In the middle of the night the idea came to him and he began to construct his machine. The formal name of the machine is the External RF Generator but he calls it “a kick ass cancer cell generator”. He has been in and out of remission and presently is battling the cancer once again.

Previous to his find, he had determined that the time allotted him to live was an ending that he reluctantly accepted. But from the age of 22 he had always tinkered with radios and his idea resulted in his using his loving wife’s pie pans, wire and in sundry other materials to begin his adventure. What prompted him were not only the cruel effects of his therapy but seeing the faces of children who were suffering with the same disease while undergoing treatment. He described that their smiling faces were transformed as a result of their treatment leading him to believe that there had to be a more humane way of treating the disease.

The machine basically makes cells act like antennae to pick up a signal and self-destruct. Theoretically, the patient is injected with gold or carbon nanoparticles of metal which are attracted to the abnormal cancer cells while ignoring the healthy cells. When patients are exposed to the radio waves only the bad cells heat up and are destroyed. He is quick to point out that there is still a long process of tests being conducted by the medical community on the machine and the theory behind his find. He was bolstered by the fact that his study appeared in an oncology publication which is a necessary step in the process. Another obstacle is the need for funding monies in order to support further research study.

But that wasn’t all to the story. He filled a test tube with salt water from a canal in back of his home and placed the tube and a paper towel in the machine. Upon turning on the machine, the paper towel suddenly ignited lighting the tube as if it were a wax candle. When he performed the experiment without the paper towel, the saltwater began to burn. What he determined was that the machine released the oxygen and hydrogen from the

water and created an incredibly intense flame of around 3,000 degrees Fahrenheit. The potential uses are limitless in that it could provide fuel for cars, create electricity, heat homes, etc. all from a renewable source: saltwater.

Readers can view videos of Kanzius by going to the following internet address: <http://www.youtube.com/login>) and, after logging in or signing up, place the words “John Kanzius” in the video search engine. The result will seem miraculous but is really the outcome of a true entrepreneur’s need to find his “truth”.

Apart from his amazing invention, I was attracted to this story because of the qualities that John Kanzius possesses. I want to pose some questions of my readers to determine whether they too have some of these qualities.

- When you believe in something, how able are you to dedicate yourself and persevere in reaching your goal?
- Although a realist, how much of a “dreamer” do you allow yourself to be in order to pursue your goals?
- When you make a mistake, should that upset you as much as it might or could you be on the cutting edge of discovering something beneficial?
- You have received a good deal in your life but how much do you believe in “giving back”?

Mr. Kanzius taught me a great lesson and I trust that this small tribute to him and what he stands for will touch your hearts and minds as well.

The details in this article truly support the saying “necessity is the mother of invention”. John Kanzius is truly an example of being able to see beyond his limitations and pain and persevere in something he truly believes with an almost obsessive attitude in order to accomplish his dream. His need to “give back” is beyond reproach and an admirable quality. I would wish that he could serve up an example for myself and all of those who hear of him. He is a survivor, an entrepreneur, an inventor and someone whose faith in God and himself has taken him into a very different sphere of influence in life. In his pursuit of his dream, although he was not concerned with making a mistake, he mistakenly came upon his machine being able to “burn water”. Truly, he teaches a valuable lesson for us all.

## A Brief Biographical Sketch

*After an over 40 year career as a professional psychotherapist and Director of The Sports Stress Clinic in Amherst, NY, Charles Bonasera came to Florida and decided to use the benefits of his previous professional experiences in his new roles of Consultant in Life Management and Business Coaching as well as his expertise as a Motivational Speaker. He once again became involved with athletes in different sports training them with his techniques to help them develop and maintain focus as well as staying in their zone. Much of his training methods are derived from the CD collection he developed under the heading of WIN-WIN SECRETS as the President of Personal Identity Controls. This collection consists of thirty-six programs dealing with vital issues in the management of stress.*

*Another role that he adopted to add to his professional career was that of Author. Early in the 1980's he wrote Guide to a Life Management Process which he has re-written as a workbook to successfully help people manage their stress which includes his own Working Model. As a result in his interest in golf and realizing that it was essentially a "mind game", he wrote The Mental Side of Golf which can benefit the beginner as well as professionals playing the game of golf.*

*He then compiled over five-hundred sayings that he had developed in the course of his professional career as stimuli to help people change patterns in their lives entitled How to Stay Well and Live Life to the Fullest. This was followed by a book documenting case studies around disruptive life patterns including ways to change them under the name of How in the Hell Did This Happen to Me? Both his personal involvement in sports as a participant, coach, manager and in his role in officiating, inspired him to write a primer for parents and coaches entitled The Legend of Little League.*

*Charles invites you to view his website at [www.charlesmbonasera.com](http://www.charlesmbonasera.com) as well as to write with your comments and questions to his e-mail address ([charles@charlesmbonasera.com](mailto:charles@charlesmbonasera.com)). He would also be very happy to communicate with his readers by telephone should they desire. His professional motto is "seeking alternative methods to happiness" and wishes those touched by his words to practice the three secrets to a happy life: "enjoy life and enjoy it thoroughly ... develop and maintain a sense of humor ... bring as much love into your life as possible.*
